You can use it in combination.

However, please use a small amount of TEST before mixing.

However, even if you only use Green Tok Tok 101  
You can achieve results.

Question 6: What are the key features of this product?

- Corporate Ideology -
- To benefit nature and people -

Hello.

I'm Ahn Haehwan, CEO of "Youngshin Bio 101".

Youngshin Bio 101 is a company that develops and distributes eco-friendly trace element complex fertilizers extracted from natural plants that exist in nature.

It pursues eco-friendly organic farming for safe food, and uses a single functional trace element complex fertilizer that is information-processed in natural plant extracts without using chemical artificial substances

I developed a product called "Green Talk Talk 101".

We launched the product to improve the contaminated land and water environment through "Green Talk 101" to contribute to the safe supply of pesticide-free food to the table of all people around the world.

It promises to increase productivity and profitability for farmers who are immersed in production in the field and safe and healthy food for consumers on the table.

Youngshin Bio 101 will repay you with passionate efforts until both farmers and customers are satisfied.

In open-air farming, houses, and smart farms, individual small gardens and Youngshin Bio 101 is a company that can use potted plants and plants at home and creates a future for new agriculture.

Characteristic) Green Tok Tok 101 is in the form of a small amount of powder

The ingredients are all edible, and pesticides

It makes people sick, but with Green Tok Tok 101

If you're going to eat the crops you've grown, it's pesticide-free

I can raise it in an eco-friendly way

raised with pesticides and chemical fertilizers

It is a product that can dramatically improve the diet of people suffering from all kinds of diseases in agricultural products with no pesticides and restore soil and nature.

Also, dustproof masks and dustproof clothes used to spray pesticides and

fertilizers to farmers

It can be peeled off, and the harvested crops can feel their own taste and aroma.

Also, a dramatic increase in production has led to farmers

It's a product that can help you a lot.

If you're thirsty while farming, green talk talk 101

You can have a drink each.

(That means it's safe, so please be careful of hype.)

In addition, Green Tok Tok 101 contains 1,200 nutrients, making it a rich food for native microorganisms and amplifying the reproduction and activity of native microorganisms.

Harmful insects or viruses such as hajimin ballworms, snails, wheezes, and centipedes can be found to be oxidized lightly in a solution diluted with green toktok at 500:1.

fly in the case of bees If it's sprayed, it could kill you

Close the door after the time you enter the hive

I recommend it.

Green Tok Tok 101's liquid on plant leaves

It's harmless to bees.

Question 7: Is GreenTalk 101 water soluble?

Yes, water-soluble water at a ratio of 1000:1

This product is used for dilution, and if diluted without residue, it will all decompose and be diluted with water.

When you first use it for crops, make sure that plants adapt at a ratio of 1000:1 and if you want to increase the growth rate of plants or increase sugar content during harvesting

If you adjust the ratio to 500:1 and use it, you can see a quick effect.

I hope you have a combination of Yupmyeon Sibi and Gwanju every 5 to 7 days

I recommend it, but if the cost is too much, I'll give you a discount

You can do it.

Green Tok Tok 101 available for all crops and plants

Experience amazing effects.

the future animal husbandry department. Products specialized in aquaculture will also be released.

※ Precautions for use

Spray enough to soak once

After the liquid dries on the leaves, the concentration increases when spraying repeatedly

Please be careful that you may suffer from a medicine that burns leaves, and in the event of the above situation, you must wash it with clear water to avoid the medicine.

Also, after diluting Green Tok Tok 101

Please use it all within 24 hours.

Spray the remaining solution into the soil.

It's a natural ingredient, so after a while, the dilution

There may be differences in efficacy and bacterial reproduction.

Thank you.
